

David Omer

Long Beach, CA • compute456@outlook.com • <https://david.simplifai.team> • +1 562-833-4552

Professional Summary

Senior cloud, platform, and enterprise integration architect with more than 25 years of experience designing, building, modernizing, and supporting distributed systems, SaaS platforms, data platforms, and mission critical enterprise applications.

Experienced across Azure, AWS, and GCP, with hands-on background in cloud-hosted systems, Azure SQL, Docker, Kubernetes, CI/CD, RESTful APIs, messaging platforms, and SQL-backed data architectures.

I specialize in designing reliable cloud-ready architectures, reusable integration layers, high-performance data pipelines, and maintainable platform components that support complex, multi-customer environments.

Known for strong architectural judgment, rapid problem diagnosis, production stability, and the ability to connect application, data, integration, infrastructure, and operational concerns into practical cloud solutions.

Core Competencies

- Cloud architecture and platform modernization
- SaaS architecture and multi-tenant platform design
- RESTful APIs, microservices, and distributed systems
- SQL Server, Azure SQL, PostgreSQL, and data platform reliability
- Legacy modernization and cloud migration support
- Azure, AWS, and GCP cloud environments
- Docker, Kubernetes, and CI/CD delivery patterns
- Messaging and event-driven integration architectures
- Performance tuning, incident diagnosis, and production support
- Architecture guidance, stakeholder alignment, and technical leadership

Experience

Independent Technical Projects & Professional Development

04/2024 – current

- Designed and implemented .NET-based applications, APIs, integration components, and automation workflows using relational databases and cloud-ready patterns.
- Built repeatable development and runtime environments using Docker, cloud platforms, and documented deployment practices.
- Developed reporting and data-processing workflows and applied A.I.-assisted automation to reduce manual overhead.
- Continued hands-on work in portable, maintainable architecture patterns for small-business and SaaS-style platforms.

Project Consulting Services, Inc. (via TEKsystems) — Senior Consultant

Industry / Client Focus: Oil & Gas, provides professional services for energy infrastructure

08/2015 – 04/2024

- Built and supported middleware systems integrating multiple enterprise platforms using SQL-based data pipelines, messaging patterns, and service-oriented designs.
- Reduced data processing latency from 24+ hours to near real-time through event-driven and optimized data flow designs.
- Designed and implemented RESTful integration layers and backend services supporting distributed enterprise systems.
- Worked with cloud-hosted environments, including Azure SQL and related services, to maintain system reliability and performance.
- Established SQL performance standards and tuning practices across large-scale relational systems, including SQL Server and Azure SQL.
- Partnered with engineering and infrastructure teams to troubleshoot production systems and improve scalability, reliability, and performance.

Planned Career Sabbatical & Independent Technical Projects

03/2014 – 08/2015

- Took an intentional career break while continuing hands-on technical work and professional development.
- Built .NET/MVC and browser-based applications using HTML5, CSS3, JavaScript, and SQL-backed application architecture.
- Developed responsive user interfaces, database-driven workflows, reporting views, and analytics outputs.
- Explored legacy-modernization approaches using web applications, relational databases, APIs, and integration patterns.

Steton Technology Group — Lead Architect

Industry / Client Focus: Food & Hospitality, SaaS platforms, mobile data collection

01/2004 – 03/2014

- Led architecture, development, and operation of a multi-tenant SaaS QA auditing platform supporting thousands of enterprise users.
- Designed scalable data models, backend systems, and reporting layers to support high-volume concurrent workloads across multiple customers.
- Implemented cloud-based infrastructure improvements using Azure and AWS to improve scalability, availability, reliability, and system performance.

- Designed a disaster recovery strategy with a 4-hour recovery time objective and 8-hour recovery point objective, incorporating encryption throughout the disaster recovery lifecycle.
- Established architectural patterns for performance, extensibility, maintainability, and operational stability across the platform.

SeeBeyond — Senior Consultant

Industry / Client Focus: Software, iPaaS

10/2002 – 12/2003

- Delivered enterprise integration solutions using Java and middleware platforms across healthcare, government, and commercial systems.
- Built and maintained 400+ system interfaces enabling data exchange across distributed applications using messaging and service-based architectures.
- Delivered secure, HIPAA-compliant integrations for hospital and clinical systems using HL7 messaging standards.
- Served as lead developer and architect for major integration programs for the US Army LMP SAP implementation, Regence Health, Commerce One, and Canada Post.

Computer Sciences Corporation — Senior Consultant

Industry / Client Focus: Professional Services

10/2001 – 10/2002

- Designed and implemented enterprise integration components supporting SAP-based systems.
- Contributed integration architecture guidance for NASA's IFMP SAP implementation.
- Developed middleware components using Java and T-SQL for enterprise data integration.

Fluor Corporation — EAI Team Lead

Industry / Client Focus: Engineering, procurement, and construction, large scale projects

01/1999 – 10/2001

- Led enterprise integration initiatives for legacy-to-SAP system migrations using message-based architectures.
- Evaluated and implemented enterprise messaging platforms, including IBM MQ / MQSeries.
- Collaborated with vendors and enterprise architects to deliver scalable middleware architecture solutions.

PM Realty Group — MIS Manager

Industry / Client Focus: Asset management, real estate

01/1996 – 01/1999

- Managed IT operations supporting distributed corporate offices, enterprise systems, infrastructure, and user support.
- Led LAN infrastructure upgrades and delivered WAN connectivity solutions.

- Developed SQL-based business systems supporting financial, purchasing, accounts receivable, and asset management workflows.

Access Development Corp — System Administrator / Programmer

Industry / Client Focus: Travel and merchandise discount platform

05/1986 – 01/1996

- Administered client/server and LAN-based systems and supported internal users with hardware, software, and business application issues.
- Migrated legacy applications to SQL-based client/server architectures and rewrote internal systems using SQLWindows.
- Developed CRM, shipping, and business operations modules supporting internal workflows.

Technical Skills

Cloud Platforms

Azure, AWS, GCP, Azure SQL Database, Azure SQL Managed Instance, cloud-hosted SaaS platforms

Cloud & DevOps

Docker, Kubernetes, CI/CD pipelines, GitHub Actions, Terraform, Jenkins, system monitoring, troubleshooting, production support

Architecture

Cloud architecture, SaaS architecture, multi-tenancy, distributed systems, microservices, SOA, event-driven architecture, 12-Factor App, SOLID, CQRS

Backend & APIs

C#, .NET Core / Web API, RESTful APIs, asynchronous processing patterns, MVC, reusable service components

Integration & Messaging

Enterprise application integration, REST APIs, HL7/FHIR, MQSeries, MSMQ, RabbitMQ, Apache Kafka, SAP integration, Azure Service Bus

Data & Databases

SQL Server 2022, Azure SQL Database, Azure SQL Managed Instance, PostgreSQL, Redis, SQLite, Oracle (8i), query optimization, indexing strategies, data platform reliability

Programming & Scripting

C#, Java, Python, JavaScript, TypeScript, Bash, PowerShell, T-SQL, PL/SQL, HTML, CSS

Leadership

Architecture guidance, technical mentorship, stakeholder alignment, requirements translation, cross-team collaboration

Education

Brigham Young University — Computer Science
1985 – 1986
